Module 0 (Week 1)
Expected Behavior

Expected Behavior – Overview
Description: You will become familiar with the expected behavior for this course.

- This is an **online** course that does not meet in a standard classroom. You are expected to have access to a reliable computer with reliable Internet access. I will provide ample warning when assignments are due and CCBC has multiple computer labs across all campuses (Catonsville, Essex, Hunt Valley, Randallstown, Dundalk, Owings Mills). You will need to access Blackboard at least three times a week.

- This course requires a significant time commitment. This is a three-billable hour class. You are expected to complete at least nine hours of work per week of reading, course preparation, homework, studying, etc. Expect no less than **_9_ hours a week** outside of class in order to earn a C and successfully complete the course.

- This is an online course, but do not expect to work in a vacuum. Discussions, blackboard messages, emails and various other forms of communication among students and the instructor will be required for the assignments. If you attempt to complete the work in a single sitting or wait until the weekend, you will not be able to complete several of the assignments.

- Students are required to read the required text, participate in online discussions, provide examples to aid in online discussions and be an active course participant. This course requires your contribution to the success of the course. The learning environment should be treated with respect and professionalism.

- The course has goals and objectives identified on the syllabus and Blackboard. If you are not satisfied with the progress of the course and/or your expectations are not being exceeded, please speak with the instructor immediately. The instructor will do his best to accommodate your requests.

- Students are expected to read, understand and begin the assignment within 3 days of the assignment. This will help identify challenges early so the instructor may provide adequate support. If you have questions or the instructions are not clear, most likely you are not alone, please ask.

- Students must take the Midterm and Final Exams in one of the CCBC testing centers. Please schedule in advance at any of the six testing centers, as many do not offer walk-in and time slots fill up quickly around exam time.

- *Students should first attempt to take concerns to the faculty member. If students are unable to resolve course-related concerns with the instructor, they should contact Barbara Yancy, CSIT Department Chair on the Essex Campus at 443.840.1957 or byancy@ccbcmd.edu*

- Best of luck and I look forward to the semester.
